ICE CREAM DONE DIFFERENT DONE RIGHT

EXPERTS IN ICE CREAM

We believe it's meant to be indulgent; enjoyed at any time, by anybody. Since 2014, led by co-founders Dirk & Josh, we've worked hard to make that happen. We've created some truly exciting, innovative flavours for both retail and food service — as well as perfecting our evolving plant-based ice cream range. Using fresh, natural ingredients and a chef's approach to flavour, we're on a mission to do ice cream right.

Based in Leeds, where our creative, scientist, world-championship winning, 4th gen Italian gelato master—Manolo - continues to drive our pursuit of perfection while experimenting with new techniques, flavour profiles and ingredients. It's his awesome fusion of science and art that makes our product so great; the molecular chemistry combined with that next-level taste.

Premium gelato / Ice Cream hybrid with low over-run for a denser, creamier mouthfeel.

Easy to scoop / quenelle straight from the freezer.

Slow melt-rate.

NORTHERN
