Fox

DISPENSERS FOR EVERYONE. EVERYWHERE.

FRESH NEW DESIGN

We have a fresh new look to our dispensers, but they are still the same highly functional devices inside. They are designed with the majority of users in mind and they focus on functionality. They are simple and ergonomic to use regardless of each person's physical capability. Maintaining the dispensers is simple thanks to their well-planned design and innovative features that simplify the daily work of service staff.

We bring well-being, care and functionality to all hygiene facilities in offices, hotels and restaurants, healthcare, industry, schools and other public spaces. We offer hygienic solutions for all needs.

Choose between white and black

Our series of dispensers encompass a well thought out range of products that are suitable for all toilets and hygiene facilities at all workplaces. Whether you choose white or black dispensers, you will receive a good looking, well-functioning product. Together with our tissue paper and other accessories, it is easy to choose the right hygiene solution for your particular needs.

Focus on the user

The dispensers have been designed in cooperation with industry experts and many different end users. With the help of interviews, observation and laboratory tests, we have collected valuable information to find sustainable and useful solutions for all kinds of hygiene facilities.

Unique features, less hassle

Our main strategy was to make was to make our dispensers as ergonomic and user-friendly as possible. For example, the soap dispensers are marked with braille to simplify their use by those with impaired vision. The soap dispenser's fully enclosed pressure surface makes it easy to use. Transparent sides make it easy for service staff to see when it is time to fill the dispenser with paper and soap, which means that the dispensers are always well-filled.

MAKE A SMART DECISION.

We make daily life simpler and more hygienic by making sure that our hygiene solutions are environmentally friendly, simple to handle and hygienic to use. When you choose Katrin, you know you are making a smart decision. Katrin is Clean & Green!

Did you know that 80% of all infections are spread via hands?*

Paper is the most hygienic product for drying your hands. It is only used once, so there is no risk of spreading infection further. The hands are also cleaned in a mechanical sense with paper towels. You can use our paper towel dispensers to feed one sheet at a time, which means that you only touch the sheet which is used. The size of the sheets has also been adapted for optimal drying. According to the "Toilet Report" from 2020, paper is also clearly the most popular hand drying method**.

Make sure you have the right hygiene solution

To us, the toilet is the most important room in the world and everyone wins if the toilet is equipped with the right paper, soap, dispensers and waste bins with the right capacity. Users can easily maintain good hand hygiene, and the service staff will save time because the toilet is simple to keep clean and fresh. The right solution will also minimise consumption and save resources.

We use tissue paper made of new fibres

Paper produced with fresh fibres is cleaner than paper made with recycled fibres because there is no risk of any remaining contamination from previous use. The tissue paper also has longer and stronger fibres, which is why they are much better at absorbing fluid. This means that the ability of the paper to mechanically remove bacteria increases and the user is able to dry their hands more quickly. The risk of bacterial growth on the hands is reduced.

The paper is also softer and gentler on the skin. Choosing tissue paper made of new fibres can be an excellent way to maintain the highest possible level of hygiene and minimise the risk of spreading disease.

* Source: BZgA (the Federal Centre for Health Education in Germany) 2016

** The Toilet Report is a study performed by an external market research company commissioned by Metsä Tissue to gain insight about end user behaviour and preferences concerning public toilets.

The black plastic parts in dispensers are manufactured from recycled plastic.

All plastic dispensers can be recycled.

Sustainable raw materials straight from the forest

We take in to account all EU legislation in relation to our raw materials. Our main source of raw material is wood fibre from sustainably maintained forests. All of our paper mills are traceable according to the PEFC and the FSC, which can prove that the forests have been harvested legally and in a sustainable way. We also take responsibility for regrowth by planting four new trees for every harvested tree. Biological diversity and mixed use of forests are important aspects to consider if we want to keep our forests alive and well for people in the future.

Produced near the market

Our paper mills are close to both the raw materials and our customer base, which means that we avoid unnecessary transport mileage. We pack our products carefully and always aim to transport less air and more product. We also have a goal to make our paper mills free from fossil fuels by 2030.

The right hygiene solution saves resources

Our system solutions reduce consumption. You don't need to fill dispensers or empty waste bins as often. Changing from folded paper tissues to system paper towels makes it possible to reduce consumption by 40%*. Changing from normal liquid soap to foam soap can mean using 35%* less soap.

Recycled plastic

We are always developing new ways of minimising our use of plastic. For example, all of our black parts in our black dispensers are made from recycled plastic. The black detailing on the white dispensers and the plastic plugs in the system rolls are also made of recycled plastic. All plastic packaging with the Green Pack mark is also made of at least 30% recycled material. Our aim is to have a completely plastic free option by 2030.

Everyone is a winner when you change to Katrin Plus

Tissue paper produced with fresh fibres uses less resources at the production site and has a lower carbon dioxide footprint through the whole lifecycle; from the forest and production to the user and finally to energy recycling. In other words, you do not need to compromise on good quality, product safety or sustainability when you choose products made of new fibres.

* Source: This calculation is made according to a consumption counter and CO₂-counter, and it is based on a company with 100 employees that go to the toilet 3 times a day.

TOILETS YOU CAN TRUST.

KATRIN SYSTEM HAND TOWEL ROLL DISPENSER is functional and dependable. It has a very high capacity. Depending on the paper quality, it contains 570 to 1,176 sheets each time it is loaded. The dispenser is also designed to minimise paper consumption.

It is easy to use with a clearly defined pressure surface which shows where you can feed a new sheet of paper if no paper is visible hanging down. Our tissue paper is of such good quality that one sheet is sufficient and all of them are eco-labelled, which is good for you and good for the environment.

Capacity is a decisive factor for toilets that are used around the clock, for example in hospitals and sports centres, because paper always needs to be available whenever someone visits the hygiene facilities.

Paper quality and paper capacity are important factors for toilets with many users and high expectations, for example at a theatre, airport or conference centre.

Reliable construction that works without complications.

Light pressure to feed paper. Controlled consumption.

The risk of infection is minimal. You only touch the sheet you use.

Choose between white and black depending on the colour of the walls. Contrasts make it easier for people with impaired vision to find the dispenser.

High capacity and easily accessible paper.

The dispenser has space for two toilet rolls. When one roll runs out, the other will take its place automatically.

Dispenser with core catcher (inner roll collector).

The dispenser can be filled while the second roll is in use. This means that there will always be toilet paper available.

KATRIN SYSTEM TOILET DISPENSER is designed to be simple to maintain, dependable in use and cost-effective. There are two versions of the dispenser: with or without a core catcher. The dispenser has space for two rolls of paper despite the small casing. Depending on which paper quality

you choose, the dispenser contains 1,600 sheets of paper. You can always be sure that there will be enough toilet paper, even though there is a lot of activity and many users at the same time.

Easy to fill. The same dispenser can be used for liquid soap, foam soap, surface disinfectant, shower soap and hand sanitiser.

The dispenser is available in two colours and sizes: 1,000 ml and 500 ml.

KATRIN SYSTEM SOAP DISPENSER has a classy simple design which helps your guests achieve excellent hand hygiene. Transparent sides make it easier for the service staff to see when it is time to fill the dispenser. We have different kinds of soap in our range, and all are marked with the Swan

environmental symbol. Choose between liquid soap and foam soap, with or without perfume, and add a separate hand sanitiser, if needed. You can also place a dispenser by the exits so users can ensure their hygiene after touching the door handle.

A fully enclosed pressure surface makes the dispenser easy to use. The dispenser is also marked with braille.

PERSONALITY AND FUNCTION.

KATRIN HAND TOWEL DISPENSER is a handy and functional dispenser designed for smaller spaces. There are two versions: mini and medium. Katrin Hand Towel Medium works with all folded towels while Katrin Hand

Towel Mini has a maximum width of 210 mm. The dispenser's design and features help you to create the special sense of comfort that you want your guests to feel. You do not need to compromise.

The guest toilet at a café, for example. Personality and function play an important part here.

Small toilets with fewer users, for example in an office, need to be supplied with products that everyone is comfortable with.

Transparent sides make it easy to see when the dispenser needs refilling.

Supports hold the paper in place and simplify the filling procedure.

Katrin Hand Towel Mini Dispenser is designed for smaller spaces. Folded towels like Katrin Non Stop and Katrin One Stop with a maximum width of 210 mm are a perfect fit.

There are two keys on the back of all dispensers. You can choose whether you want to open the dispenser with a key or not.

SMART AND EFFECTIVE.

KATRIN GIGANT DISPENSER is simple to use for several reasons. Among other things, we have incorporated a function which makes it possible to fill the dispenser before the roll has finished. The toilets in hotels and restaurants can often

be stylish and aesthetically designed. Katrin Gigant is a simple, stylish dispenser that looks like a part of the environment and makes the user feel comfortable. Going to the toilet should be obvious and simple, even when you are away from home.

When you load the dispenser with new paper, the remaining roll can be hung on the folding holder.

The lock can be used with or without a key.

Gigant is available in two sizes: S and L.

Easy paper-tearing on all sides. The dispenser also has an adjustable brake function so the paper cannot be pulled out so far that it ends up on the floor.

SIMPLE AND FLEXIBLE.

KATRIN CENTER FEED DISPENSER is available in two sizes. It has all of the features you expect incorporated in an appealing design. You can choose from a range of paper products to tailor the usage for your business.

People who use paper at work have high demands that it should perform properly and meet expectations so their time can be spent on more important things.

You can choose between many different kinds of paper quality. Both with and without pull-out inner roll.

Grabbing the paper is simple and can be done with one hand. The paper-tearing teeth are curved inwards to prevent the risk of injury.

The dispenser is available in two sizes: S and M.

KATRIN SYSTEM HAND TOWEL ROLL DISPENSER

- High capacity
- Paper is easy to pull out
- The transparent sides make it easy to check the paper level
- Easy to fill
- The tear-off mechanism can be opened completely and is easy to clean

THE RIGHT SOLUTION SAVES RESOURCES.

Choose paper, dispensers and accessories according to how many people use your toilet and the needs they have.

Begin by asking two questions:

1. How many people use the toilet?

Does it have many or only rather few users? Is it used constantly or does its usage peak at certain times? How many service intervals are needed?

2. What needs do the users have?

Do they have special demands regarding paper quality, i.e. high performance, environmentally friendly or extra hygienic paper?

Saving resources

The best solutions save the maximum amount of resources by minimising usage and hygiene risk. Paper, dispensers and accessories from Katrin perform at the highest level and give the best possible return.

EXTRA CARE

FOR ALL NEEDS

FEW

USERS

MANY

Katrin stands for well-being, care and functionality in hygiene facilities in healthcare, industry, restaurants, hotels, schools and other public toilet facilities. Their aim is to give you the best possible conditions to offer your guests the best hygiene solution so that you can concentrate on business. Everyone is a winner when your toilet is equipped with the right paper, suitable dispensers and other accessories. Users can maintain good hand hygiene and the service staff will save time because the toilet is simple to keep clean and fresh. Working together with Katrin we want to make our customers' lives simple and improve their business. We offer tailored solutions based on your needs.

Metsä Tissue is one of Europe's leading tissue paper suppliers to households and companies as well as one of the leading suppliers of baking paper globally. Metsä Tissues own the following trademarks: Lambi, Serla, Tenta, Mola, Katrin and SAGA.

Katrin is a part of the Metsä Group, which is one of the world's largest forest industry groups.
