### An introduction to SCG Packaging (SCGP)

SCG was first established in Thailand in 1913 and not only played a pivotal role in the progress and development of the country, but is also the largest and oldest cement and building material company in Southeast Asia. Since then SCG has grown continually and diversified into three core businesses, namely SCG Cement-Building Materials, SCG Chemicals and SCG Packaging (SCGP). It now operates 56 factories in six countries – Thailand, Vietnam, Indonesia, Philippines, Malaysia, and UK to provide packaging products and solutions to diverse industries, e.g. food and beverage, electronics, automotive, e-commerce industries.

SCGP has gone from strength to strength whilst continually expanding its production base on a domestic and international level. Now boasting more than 120,000 SKUs of diverse products, it is recognised as the leader in the fully-integrated packaging chain in Southeast Asia and the “Packaging Solutions Provider” that meets the needs of customers.

SCG operates on the basis of social responsibility, sustainability and continued innovation, and as part of this family of businesses Go-Pak can not only continue the great service we provide our customers, but also offer further international support and a wider product range for our current and future customers in the UK, Europe and US.

## About The Go-Pak Group

The Go-Pak Group is the British subsidiary of SCG Packaging (SCGP) and consists of 3 operating companies. We specialise in providing disposable products and packaging for the Food Service, Cash & Carry and Retail sectors. Through our expertise in manufacturing and supply chain management along with our exceptional product quality and outstanding customers service, we aim to provide the best possible solutions for our customer's needs.

The operating Companies within the Go-Pak Group are as follows:

Go-Pak UK was established in February 2009 and has since then undergone numerous expansion projects; now comprising our Bristol-based Head Office and Sharpness-based 10,700m<sup>2</sup> Distribution Centre with space for 15,000 pallets. Go-Pak UK serves European markets with products made within the Go-Pak Group, or sourced from 'Best in Class' overseas manufacturing partners.

Go-Pak Paper Products Vietnam Limited was formed in 2018 and commenced production in September of the same year, this facility is located in Binh Duong Province, approximately 40 kilometres from Ho Chi Minh City.

Go-Pak Paper Products Vietnam Limited is a 12,000m<sup>2</sup> purpose-built facility with the capability to manufacture over 100 million units per month, this includes products such as our premium quality single wall paper cups, corrugated ripple cups, double wall cups, soup containers and coffee clutches. Products are manufactured using high quality board and include PE and PLA lined options.

Go-Pak Paper Products Vietnam Limited has a global customer base and is the largest manufacturer of disposable paper cups and containers in Vietnam.

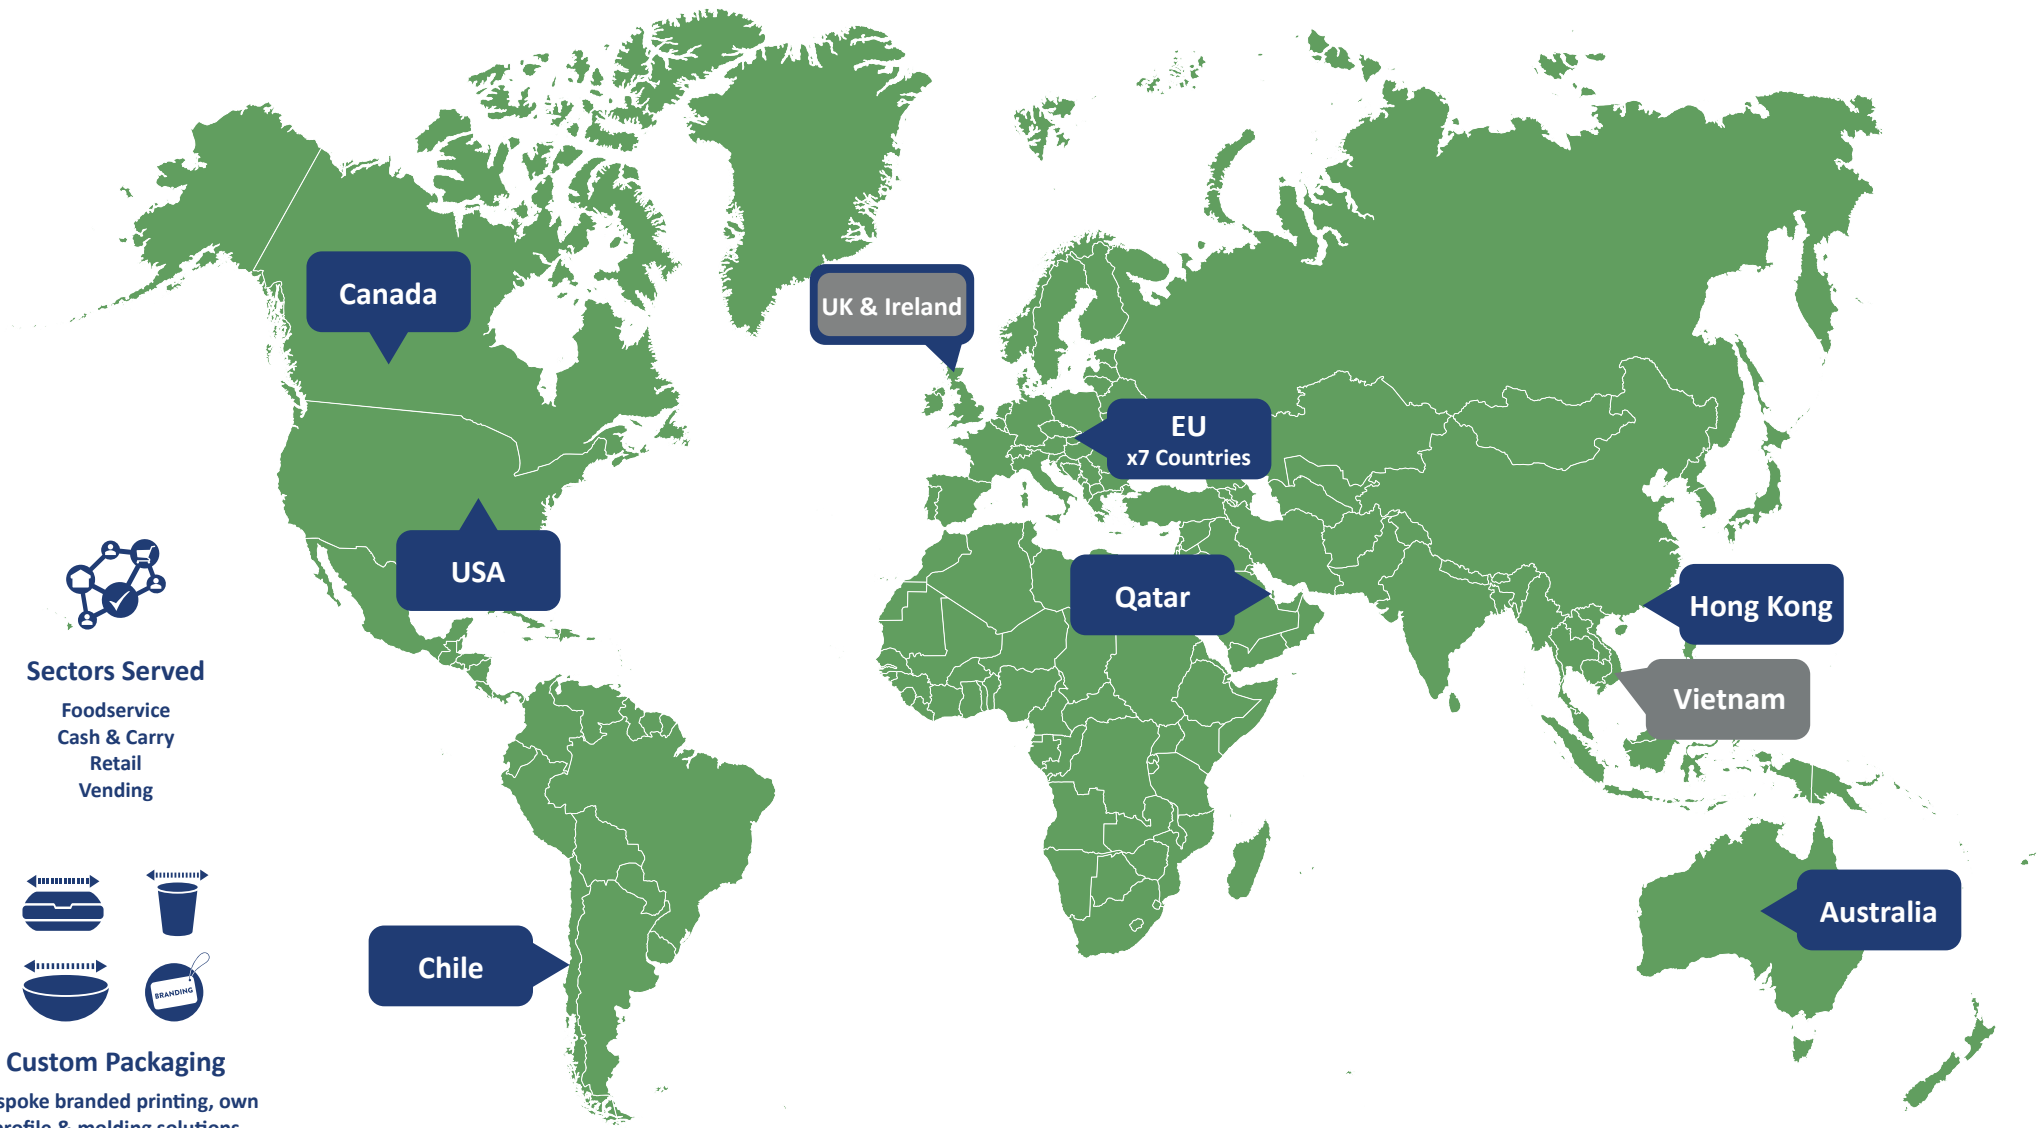

Go-Pak Vietnam Limited was established in 2013 and is also located in Binh Duong Province, approximately 40 kilometres from Ho Chi Minh City.

This 15,346m<sup>2</sup> purpose-built facility gives us the scope to supply high volume customers on a global scale. We manufacture a range of high quality disposable products including plastic cutlery, injection molded drinkware, food platters and serving utensils.

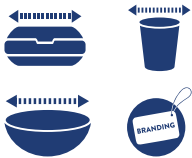

With 72 injection moulding machines and the scope to add a further 28 more, Go-Pak Vietnam Limited is strategically positioned for large scale business opportunities, continuing current growth trends with a global focus. We manufacture bespoke products to customers own specification where required, including retail shelf ready packaging solutions.

A core focus on the Go-Pak Group of companies is to establish long term, mutually beneficial partnerships whilst striving to deliver the best value for money with consistent product quality.

# Quality Assurance

At the Go-Pak® Group, we understand the importance of first-rate quality standards in everything we do. Our commitment to a stringent quality management program has enabled us to consistently deliver quality products to our customers, whilst sustaining impressive year-on-year growth since formation.

We recognise the BRC Global Standards as the foundation of sustainable quality throughout our products and services; as such we are proud that our UK distribution platform and both our Vietnamese manufacturing facilities, hold certification to the highest available grades.

## Go-Pak UK

- Certified Grade 'AA' – BRC Storage & Distribution.
- ISO 9001:2015 certified.
- ISO 14001:2015 certified.

## Go-Pak Vietnam

- Certified Grade 'AA' – BRC IoP.
- Intertek Ethical Audit certified.
- Sedex Supplier Member.
- Large Retailer Supplier Approved.

## Go-Pak Paper Products Vietnam

- Certified Grade 'A' – BRC IoP.

# Sustainability

The Go-Pak Group recognises that sustainability is more than a product or campaign, it's a commitment to acting responsibly in all that we do. Sustainability is at the forefront of our decision-making process at every level and function of our operation.

We constantly strive for improvements and innovations that enhance our environmental performance, securing a healthy environment for future generations.

Our UK platform was the first in its' industry to achieve certification to the globally recognised; ISO 14001:2015 environmental management standard. Not only do we consistently review our environmental performance and give effect to changes improving recycling, water and energy consumption, and reduced carbon emissions through haulage partnerships; we develop these practices and principles throughout our global supply chain through close collaboration with all manufacturing partners.

Many of our products have been re-engineered to incorporate optimal material consumption, without compromising our stringent quality standards. We procure ethically cultivated raw materials from reputable, certified suppliers, focussing on wood-derivative materials from FSC or PEFC sources. In our bespoke options we prioritise the use of water or soya-based inks, reducing our dependence on unsustainable materials. We have significantly developed our compostable Edenware brand to promote the use of natural materials while improving the environmental impact of our portfolio.

We, the Go-Pak Group, are fully embracing our wider obligations in all that we do, undertaking due-diligence on global partners and opportunities to ensure we're operating in pursuit of the UN's Sustainable Development Goals.

SKU	Item Description	Brim Diameter(mm)	Case Size	Pallet Quantity
B01020	4oz Single Wall White PLA Cup	60	20x50	x48
B01022	8oz Single Wall White PLA Cup	80	20x50	x32

- Recyclable and biodegradable

## PROMOTE YOUR BUSINESS

Bespoke branded packaging acts as an extension to your marketing by giving you an important opportunity to promote your business.

The simple process of somebody drinking their favourite beverage, combined with travelling from one location to another offers considerable time to get you brand noticed.

This effective tool can build and establish brand awareness and brand recall with the end consumer and people they come in contact with.

## OUR PRINTING PROCESS

At Go-Pak we use a spot colour printing process because it is the best method to ensure colour accuracy, print run continuity and provide a high quality print.

The Pantone Matching System (PMS) is a universal colour matching system where each colour is pre-mixed with a specific formula and represented by a numbered code, similar to picking out your favourite paint to decorate a room.

Another key benefit of using Pantone inks is that they are vegetable (soya) based and completely food safe.

At present we can offer a maximum of 6 solid Pantone colours per print with either a gloss (coated) or matt (uncoated) finish.

## Bespoke Design

### YOUR BESPOKE PRINT OPTIONS

To keep the process as straightforward as possible, a member of our Go-Pak team will talk you through all the requirements for custom print, from choosing the right products, to the minimum order quantities (MOQs), to finalising designs and deciding quantities through to delivery.

There are two ways that we can help you get ready for custom printing your packaging.

#### WE CAN

Design your artwork for you! Just send us your logos with an idea of what you want and how you would like it to look and we will take care of the rest.

Let us know how you would like it packed and we will design the most optimum packaging solution.

#### OR

We can supply you with our templates for your own graphic designers to place your artwork and specifications on:

- Lead time depends on quantities and packaging requirements.
- Original packaging design.

Go-Pak works with a number of blue chip companies in all sectors of the industry and our consultative approach to own label will deliver your requirements of quality packaging for your products.

### ADDITIONAL SERVICES FOR YOU

As well as following specific project briefs and brand guidelines, we can offer some additional essential services designed to help you determine that your design is perfect for your requirements, before going into the mass production phase.

- Colour matching.
- Original packaging design.
- Complete redesigns.
- In-house product mock-ups.
- Pre-mass production flat samples.
- Pre-mass production fully formed samples.
