

Cleaning products that are kind to our planet

**SUSTAINABLE
CLEANING RANGE**

The cleaning industry provides essential services to keep places spotless and germ-free the world over. That's why it's increasingly important we do this in a way that reduces any impact on the planet – by using less plastic, less chemicals and more eco-effective solutions.

TAKING A TRADITIONAL APPROACH TO SUSTAINABLE CLEANING

As a business, it's not just product innovation where we are looking to improve the sustainability of our products. We've also set our sights on our core offering of traditional cleaning products such as mops, brooms and cloths – products that are used day-in-day-out and which aren't often associated with being typically green.

Whether you're looking to make small changes to your everyday cleaning processes with sustainably-sourced and manufactured traditional products, or you're considering an overhaul of your cleaning system with innovation such as Toucan Eco, it's important we make a change in the right direction.

The products listed in this catalogue use recycled or recyclable materials, made in the UK to reduce transportation, or reduce water, chemical or plastic waste. Here's how we've made everyday products more sustainable:

Cloths made from recycled clothing

Mop made from cotton waste

FSC-certified brushware

Chemical-free cleaning

Products made from recycled plastic

Exel® microfibre cloth tests prove low microplastic shedding

We've all heard about the growing concern around oceans polluted with plastic waste - War on Plastic's Hugh Fearnley Whittingstall vividly showed how the equivalent of a truckload of plastic waste is dumped into the world's oceans every minute.

Trials carried out have indicated that microfibre consistently outperform traditional cloths in terms of their ability to remove dirt, grease and bacteria from a variety of surfaces, making them an excellent product for both commercial and domestic cleaning. They also reduce the need for synthetic and potentially harmless cleaning chemicals.

You can use them dry when dusting and the fibres create static, which attracts dust leaving a dust-free finish. When cleaning, wet with water and ring out thoroughly, then the fibre's capillary action helps scrape the surface, lifting and capturing dirt and bacteria.

But are they harmful to the environment?

We wanted to make sure that the microfibre used in our leading cloth, the Exel microfibre cloth, minimised any harmful effects on the planet and didn't outweigh the positives of using less chemicals.

To do this we sent samples to an independent laboratory in Germany that specialises in testing the shedding of microfibre laundry conditions. Here they simulated 100 washes at 50°C and measured the filtration of shredded microplastics after each cycle. This is based on what they call the MLC Index, which is the amount of microparticle loss per cleaning cycle of one square metre of textile.

The lab then rates its findings much in the same way as the energy efficiency rating method used for electronic products and light bulbs, but with an A rating meaning low emission, B medium emission and C high emission.

We're really pleased when the test results came back with Exel® being awarded an A, placing it firmly in the low emission band. This means the cloth is proven to shed less than many products.

SURFACE LEVEL CLEANING

Ecofibre range

New microfibre cloth and scourer made from eco-friendly fibres.

Ecofibre Scourer

The Ecofibre scourer is a recycled, non-scratch scouring pad for tough, eco-friendly cleaning that's made using 40% plant fibre and nut shells, and 15% recycled polyester.

104812 22x15cm 20x10pk

Ecofibre Microfibre Cloth

The Ecofibre cloth has the cleaning power of microfibre with 55% of each cloth made from recycled plastic bottles. Five cloths packed in a presentable box which is made from recycled and recyclable card.

104801 40x40cm 20x5pk

750ml Recycled Spray Bottles

A 750ml 98% recycled and recyclable r-HDPE eco-friendly spray bottle made in the UK out of plastic waste, so it removes disposable plastic from the UK's plastic waste economy and takes less energy to manufacture than virgin plastic. It features a visible strip to view the liquid level. Total 55% recycled content with spray trigger.

SURFACE LEVEL CLEANING

What should we consider when deciding to use microfibre cloths to clean?

- Make sure they are low linting and short pile to reduce shedding. This also means they're less likely to leave fluffy deposits while you clean on high gloss surfaces such as metal and mirrors.
- Microfibre requires less water and chemicals making it cost effective and beneficial to the environment.
- It absorbs around seven times its own weight in liquid, which is perfect for cleaning up spills.
- They are easy to clean, quick to dry and can be washed many times over.
- Though microfibre doesn't kill bacteria, it effectively lifts and removes 99.9% of anything that is on a surface.

Exel® Microfibre Cloth

Exel is our most popular knitted microfibre cloth, which is ideal for quick and effective cleaning. Rated A for microplastic shredding efficiency.

101157 40x40cm 200

Low microplastic shedding

No chemicals required

Reusable

Caterers Scourer

The standard green Caterers Scouring pads are designed to easily remove tougher dirt, suitable for use in catering and general cleaning. Pads are now made from 100% recycled material.

LOW LEVEL CLEANING

Exel® Prairie Mop

Kentucky style mop with Exel fitting attached to avoid user contact with soiled mop when changing heads. Made from PY or multi-yarn in two weights, with colour coded fittings.

102235 PY 450g 30 102228 Multi 450g 40

PY Exel® Socket Mop

A traditional yarn mop with our Exel push fitting, designed to avoid the mop slipping on the handle whilst wringing. Absorbent PY yarn is suitable for smoother floor surfaces like laminate or lino flooring.

102266 200g 6x10pk

Big White Exel® Prairie Mop

A lightweight, high performance Prairie mop made from highly absorbent, low-linting, non-woven fabric, with an Exel push fitting attached. Ideal for high traffic areas as floors dry faster after cleaning.

102246 247g 40

Exel® Microfibre Socket Mop

The microfibre yarn makes it very absorbent and cleans a larger floor area faster than traditional mops. The stayflat band increases contact with the floor, and the low linting looped microfibre yarn prevents tangling.

What does FSC® mean to you?

When we made the decision to sell a range of wooden brushware that's made from sustainable sources, we felt that the best way we could achieve this was by supplying products certified by the Forest Stewardship Council (FSC®), which helps take care of forests and the people and wildlife who call them home.

FSC stands for 'Forest Stewardship Council'. They are an international non-profit organisation dedicated to promoting responsible forestry. FSC certifies forests all over the world to ensure they meet the highest environmental and social standards.

Products made with wood and paper from FSC forests are marked with the 'tick tree' logo. When you see this logo, you can be confident that buying it won't mean harming the world's forests.

Forests are inspected and certified against strict standards based on FSC's 10 Principles of Forest Stewardship. These inspections are undertaken by independent organisations, such as the Soil Association, that are accredited by the FSC. In order to be given FSC certification a forest must be managed in an environmentally appropriate, socially beneficial and economically viable manner.

This is what makes the FSC system unique and ensures that a forest is well-managed from the protection of indigenous people's rights to the methods of felling trees. Forests that meet these strict standards are given FSC certification and the timber is allowed to carry the FSC label.

In addition to forest certification, the FSC system includes a certified chain of custody that tracks the timber through every stage in the supply chain from the forest to the final user.

For Robert Scott products, this includes our wooden range of brushware including brooms and hand brushes.

Wooden Brooms

A good quality range of sturdy larger broom heads with soft coco fibre or stiff bassine bristles. Also available with metal handle stay for added support. Ideal for outdoor or more heavy-duty sweeping tasks. Can be ordered complete with handle in a choice of lengths. FSC® certified.

Toucan Eco becomes first hypochlorous disinfectant to receive double certification against germs

What is Toucan Eco?

Toucan Eco, a multipurpose chemical-free solution, has become one of the first cleaning product of its kind in the UK to receive both EN 14476 and EN 16777 certification, proving its virucidal efficacy to kill up to 99.999% of germs.

EN 14476 – the more widely known certification – is a suspension test where the efficacy of the solution is tested in vitro. EN 16777, which is a certified surface test, proves that this efficacy can be applied in the real world of surface disinfecting and other cleaning processes.

As well as the latest virucidal tests, biotech founder Centrego Ltd has already had the solution certified to EN 1276 and EN 13697 standards for bacterial efficacy. It is also registered as an EU Biocide for disinfectant use by the European Chemicals Agency (ECHA). As it's made at a low concentration and gentle pH, it's also food-safe, non-toxic and hypoallergenic, avoiding skin irritation and breathing difficulties for users.

The solution comprises tap water and salt which is electrolysed to break up and recombine the naturally occurring elements of water (H₂O) and salt (NaCl) to produce hypochlorous acid (HOCl), an effective disinfectant, and sodium hypochlorite (NaOCl) at a concentration and pH that acts a gentle cleaner.

Trusted by:

Toucan Eco is a sustainable and chemical-free disinfectant and cleaning system for businesses which removes the need for 80% of chemical cleaning products while significantly reducing single use plastic bottles and cutting costs for a business.

Toucan Eco helps the Restaurant Group gain highest sustainable restaurant rating

The Restaurant Group (TRG) is one of the UK's biggest hospitality groups with a portfolio of over 400 restaurants and pubs including Wagamama, Frankie & Benny's, Chiquito and Brunning & Price.

Over the last couple of years, they have rolled out Toucan Eco as part of a spray and wipe cleaning method on worktops, tables and chairs. By replacing 11 different chemicals, this has saved TRG 2.7 tonnes of plastic packaging and 35,000 tonnes of chemicals across 210 sites, and contributed towards their 3-star rating with the Sustainable Restaurant Association.

TOUCAN ECO

Toucan Eco eSpray

The domestic eSpray model makes 330ml of the powerful, safe and eco-friendly disinfectant cleaner in 5 minutes. The kit includes the eSpray, measuring spoon and funnel, USB cable and user guide.

104744 350ml 1

Toucan Eco Worktop

Designed for cleaning smaller workplaces. It makes one litre of eco-friendly and multipurpose antibacterial cleaner in five minutes. The kit includes the 1 litre activation unit, measuring spoon, mixing rod, spray bottle and salt.

104004 1L 1

Centrego Renew

Designed for small workplaces and cleaning on the go, the Renew makes two litres of normal or double strength solution in four or eight minutes. Includes the jug and activation base, atomiser spray bottle and spoon.

104977 2L 1

Toucan Eco Active

Suitable for small to medium-sized facilities, and produces 10 litres of solution in around 15 minutes. The system includes a generator, 10 litre tank, brine salt dispenser, discharge tap and shelf.

104540 10L 1

Toucan Eco Active Plus

Suitable for medium sized facilities and one activation, which takes around 40 minutes, produces 20 litres of antibacterial cleaner, which can be poured into bottles or buckets using either of the dilution dispensers. Includes a generator, 5 litre tank, brine salt dispenser, discharge tap and shelf.

104541 20L 1

Toucan Eco Flow

Suitable for large facilities. Automated to produce a constant flow of disinfectant cleaner. It can also be configured for cleaning and disinfecting solutions. Includes a touch screen unit, holding tanks, high volume dispensing nozzle for buckets and scrubber dryers, low-volume nozzle for spray bottles, and marine grade stainless steel frame and castors.
