*quintessential italian design*

RCR Cristalleria Italiana was founded in 1967 in the heart of Tuscany, thanks to a group of craftsmen who, with passion and talent, brought the millenary tradition of glassmaking to a higher level.

All products are made of Eco-Crystal, a material of the highest quality and made with total respect for the environment. The factory has no need for a smokestack because the production is emission-free and uses renewable energy to create 100% recyclable products.

Today, RCR Cristalleria Italiana stands out in the market of tableware, wine-tasting and mixology, combining tradition with fervent innovation, design and research, aiming to satisfy those who use our products for all occasions.

*made in italy*

Choosing RCR Cristalleria Italiana and Eco-Crystal means counting on Made-in-Italy quality, knowing that you have done the right thing for your business and for the environment.

## ENVIRONMENT

- RCR employs only electric furnaces.
  - The process of melting and fining is completely electric and without smoke emissions.
- 

### *100% recyclable*

- The absolute pure raw materials used, allow the LUXION® ULTRACLEAR ECO-CRYSTAL GLASS to be 100% recycled.
  - 99.9% Percent internal cullet recovery.
  - No polluting bleaching agents are used in the process.
- 

### *only renewable energy*

- Photovoltaic panels: 23,000m<sup>2</sup>
- Biomass plant
- Geothermal Energy

## ENVIRONMENT

### ECO-CRYSTAL

The whole production process is completely electric while keeping an eye on consumption reduction.

#### *energy saving*

In the last 10 years, RCR has:

**Reduced its electric consumption by 45%,**

which is equivalent to the average consumption of a village of 5,845 people, while also

**Reducing gas consumption by 28%,**

the equivalent of 2,586 residential heating. RCR were able to do that without losing production efficiency.

#### *energy recovery*

RCR does not waste energy as it is constantly recycled. The energy released by machines is recovered and reused while heating is conveyed in order to fuel the heating system.

#### *water recycling*

RCR recycle 40% of water employed in the production process while the part that cannot be recycled is decanted and treated to make it extremely pure.

#### *ethical approach in managing raw materials*

RCR has decided not to use raw materials that release nitrogen oxides, the main gas responsible for acid rain. Products are made without using rare raw materials that are useful for medical purposes. For instance, Gadolinium isn't used because it is rare and essential for CT scan procedures.

## PERFORMANCE

The success of the Alkemist range lies in combining the complexity of design with the typical lightness of a tasting glass, an alchemy that makes this line unique and inimitable. The growing demand and suggestions from some of the leading hotels and restaurants in the world led us to develop the water glass and the gin glass. The composition of the line, including goblets and glasses, is suitable for both professional and home use.

Designed for the finest table settings, Aria is the top range for RCR collections. These thin glasses are very shock resistant thanks to the high-density of eco-crystal. The design of the glass angles in from its widest point, indicating the right level of wine to be poured, while the wide cone-shaped bowl of the glass allows you to appreciate the gradations of colour at its very best.

This line has been conceived to meet all the demands of wine lovers. Goblets, glasses and decanters feature a classic design, which is both elegant and international.

Designed for modern and minimalist table décor, the flat bowl holds the wine in a trapezoid shape, typical of modern table settings. The refined design expresses this in the slight reopening of the rim which, in addition to enhancing the release of aromas, facilitates the sliding of the liquid during tasting and gives the glass a soft, elegant silhouette.

*leading the way with state of the art glassware*

Bormioli Rocco's first glassware factory dates back to 1825, but historians say the origins of Bormioli Rocco glass can be traced to the Middle Ages. With stemware, tumblers, beer glasses and iconic food storage jars gracing tables around the world, quality is the cornerstone of the foundation supporting the Bormioli Rocco brand. The manufacturing facilities utilise state of the art technology and economically source only the best raw materials. From the finest sand imported from Germany to organic glazes used to colour glass, all are brought together in products influenced by exhaustive design research. Thanks to continuing investment in technology, research and design, Bormioli Rocco has become one of the leading glass manufacturers in the world.

*create a custom experience*

Engrave your company's logo on your glassware for brand recognition while indicating the desired pour line for your staff's reference. Steelite International's 'laser-true' technology gives you the opportunity to create a unique addition to your tabletop and a cost-saving solution for your business.

BORMIOLI ROCCO  
*made in italy since 1825*

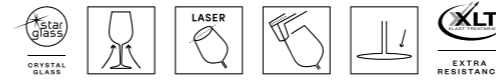

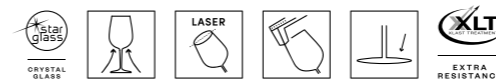

*the elegance you want, the durability you need*

“In alto i calici” is the traditional Italian phrase meaning to “Raise your glasses” before a toast. The inAlto collection is Bormioli Rocco’s toast to fine Italian design and was created with the restaurateur in mind; providing the elegance you want, and the durability you need. The distinctive angles and tall, thin stem beautifully enhance a table setting. The brilliancy of Star Glass provides the guest with an exceptional wine tasting experience, while the durability of the XLT strengthened stem maximizes operator value. ### *aspen everclear drinkware*

- Not recommended for use in microwaves or high temperature sterilisers

### *strahl*

#### Care guidelines

- Strahl beverageware is made from an incredibly strong product called polycarbonate. Follow these simple rules to ensure your beverageware remains crystal clear.
- Avoid stacking (unless you are using the CapellaStack range, which is designed for stacking) whilst carrying or storing it. Polycarbonate products are incredibly tough so will scratch other polycarbonate products if allowed to rub together.
  - Wash in the dishwasher or by hand with warm soapy water to remove residues from juice, milk, stout, etc. Washing in a steriliser may result in a build up of residue.
  - Polycarbonate may be scratched if cleaned with abrasive brushes. Buffing with a microfibre glass polishing cloth will minimise any light scratches or abrasions.
  - The Da Vinci range has a threaded joint that should not be unscrewed.

#### Dishwasher safe

Strahl is completely dishwasher safe in both standard and commercial dishwasher systems. Strahl products have been tested in a STARLINE GM High performance glass washer for 2000 wash cycles.

#### Test details:

- Klenzmatic KM1 Glasswasher detergent
- Wash temperature 65 °celsius (149 °fahrenheit)
- Rinse temperature 80 °celsius (176 °fahrenheit)
- Wash cycle time 45 seconds
- Rinse cycle time 15 seconds

#### Results:

After 2000 wash cycles, Strahl beverageware products showed minimal micro scratches, not visible under normal usage conditions.

#### What can I serve in my Strahl beverageware?

The following aniseed based drinks cannot be used with any kind of polycarbonate beverageware as they will cause permanent damage: Pernod, Anis, Ricard, Raki, Ouzo. Milky drinks may leave a residue if not washed with warm soapy water.

#### Fridge and freezer safe

All Strahl beverageware products can be chilled in the fridge or freezer, with superior insulation properties keeping beverages at optimal drinking temperature for longer. Perfect for desserts and frozen drinks.
